SGCN and Stressors Associated with Habitats

Report Date: January 13, 2016

Macrogroup: Wet Meadow-Shrub Marsh

Stressors Associated With This Macrogroup

IUCN Level 2 Threat Name: Agricultural and Forestry Effluents

Notes: Runoff from poorly buffered farmlands may add excess nutrients, sediment, heavy metals, etc.

IUCN Level 2 Threat Name: Annual and Perennial Non-timber crops

Notes: Some marshes lack buffers from adjacent farmlands

IUCN Level 2 Threat Name: Commercial and Industrial Areas

Notes: Most future impacts associated with secondary effects including runoff, landscape context etc.

IUCN Level 2 Threat Name: Domestic and Urban Waste Water

Notes: Runoff from adjacent development may add excess nutrients, sediment, heavy metals, etc.

IUCN Level 2 Threat Name: Housing and Urban Areas

Notes: Most future impacts associated with secondary effects including runoff, landscape context etc.

IUCN Level 2 Threat Name: Invasive Non-native-Alien Species-Diseases

Notes: Stressor is much lower in northern Maine

IUCN Level 2 Threat Name: Livestock Farming and Ranching

Notes: Some marshes lack buffers from adjacent farmlands

IUCN Level 2 Threat Name: Roads and Railroads

Notes: Both direct (habitat loss, changes to hydrology) and indirect (roadkill, runoff) impacts possible

IUCN Level 2 Threat Name: Roads and Railroads

Notes: Both direct and indirect impacts possible

IUCN Level 2 Threat Name: Utility and Service Lines

Notes: Powerlines, pipelines etc.

Habitat Conservation Actions:

Relevant conservation actions for this habitat are assigned within broader habitat groupings in Maine's 2015 Wildlife Action Plan: Element 4, Table 4-15. Click on the Habitat Grouping of interest to launch a habitat based report summarizing relevant conservation actions and associated SGCN.

Species Conservation Actions:

Conservation actions that may benefit species associated with this habitat can be found in Maine's 2015 Wildlife Action Plan: Element 1, Table 1-3. Click on the species of interest to launch a species based report summarizing relevant conservation actions and associated habitats.

The Wildlife Action Plan was developed through a lengthy participatory process with state agencies, targeted conservation partners, and the general public. The Plan is non-regulatory. The species, stressors, and voluntary conservation actions identified in the Plan complement, but do not replace, existing work programs and priorities by state agencies and partners.
